

Paper 3: Section A: Fieldwork

I can select appropriate questions for my geographical enquiry	
I understand the geographical concepts that underpin my enquiry	
I can select appropriate sources of primary and secondary data	
I know the potential risks of conducting fieldwork and how to reduce them	
I know the difference between primary and secondary data	
I can identify and select appropriate human and physical data	
I know how to measure and record data using different sampling methods	
I can describe each data collection method and justify why I chose it	
I can produce a range of visual, cartographic and graphical data presentation methods	
I can select appropriate data presentation methods for my fieldwork enquiry	
I can describe, explain and adapt my presentation methods	
I can describe, analyse and explain the results of my fieldwork data	
I can establish links between data sets	
I can use appropriate statistical techniques	
I can identify anomalies in fieldwork data	
I can draw evidenced conclusions in relation to the aims of my enquiry	
I can identify problems with data collection methods	
I can identify the limitations of data collected	
I can suggest why other data might be more useful	
I can discuss the extent to which conclusions were reliable
